SPRING-SUMMER

### 2.4GHz Digital wireless

Our digital 2.4GHz technology has the fastest wireless data transmission and virtually eliminates interference and crosstalk.

### ISCTec™

Revolutionary Integrated Speed Cadence Technology (ISCTec™) sensor. Combines both measurements in a single unit that mounts quickly on virtually any chainstay.

PATENTED:  
UNITED KINGDOM / GERMANY / FRANCE /  
SPAIN / ITALY / NETHERLAND / BELGIUM /  
CHINA / HONG KONG

### Back Light

EL or LED backlight illuminates screen when pressed.

### ClickTec™ / ClickTec+™

The simple and effective ClickTec™ mode button makes toggling through functions as easy as possible. By integrating the toggle switch into the face of the computer itself, CatEye has eliminated the frustration of having to feel or look for the right button while riding. The cantilevered computer body allows the portion of the screen pushed to act as the button itself, creating a sleek, concealed-button appearance and maximizing display space.

PATENTED:  
USA  
UNITED KINGDOM / GERMANY / FRANCE /  
SPAIN / ITALY / NETHERLAND / BELGIUM /  
JAPAN

### FlexTight™

The innovative and versatile FlexTight™ bracket by CatEye can be quickly and securely fastened to virtually any handlebar or stem. Fully re-usable, the FlexTight™ bracket mounts easily without tools and can be finely adjusted and tightened by hand enabling numerous possible computer placement configurations.

PATENTED:  
UNITED KINGDOM / GERMANY / FRANCE /  
NETHERLAND / BELGIUM / LUXEMBOURG  
CHINA / HONG KONG / JAPAN

PATENTED: / MODEL: SP-11

UNITED KINGDOM / GERMANY / FRANCE /  
NETHERLAND / BELGIUM / DENMARK

### Reverse Offset Lens technology

Engineered for optimal brightness and efficiency, our Reverse Offset Lens design launches the next generation in lighting technology.

### OptiCube™ technology

Our proprietary OptiCube™ lens technology maximizes brightness for greater visibility.

### Auto Light technology

Auto on/off controlled by motion and light optic sensors to automatically turn light on when darkness and motion are detected.

### ANT+™

Compatible with CatEye or third-party ANT+™ sensors

### GPS

Tracks distance, time, speed and GPS position

### WEB Uploadable

Route data log and the data including altitude with maps can be shared online

### PC Downloadable

Download training data to your computer

### ROAD BIKE

Road bike use recommended

## CATEYE TECHNOLOGY

### Reflector technology

Our reflector technology exceeds highest government standards for reflective capabilities in USA(CPSC), Great Britain(BS), Europe(ECE) and Japan(JIS).

### Rechargeable technology

Solar Cells recharge the battery under direct sunlight. USB rechargeable products recharge the batteries from any USB port.

### Adjustable

Bracket rotates to adjust light beam angle.

- GPS AND ANT+/SPEED+CADENCE+HEART RATE+POWER (STEALTH 50), GPS/SPEED (STEALTH 10)
- 11 FUNCTIONS & 12 FEATURES (STEALTH 50), 8 FUNCTIONS & 11 FEATURES (STEALTH 10)

CatEye's Stealth cycle computers are simple to operate and easy to use. Both the Stealth 10 and the Stealth 50 feature the accuracy and convenience of GPS, eliminating the need for a sensor and making set-up super quick. The Stealth 50 is ANT+™ compatible, so it works with CatEye and third party ANT+™ power, heart rate, cadence and speed sensors.

The Stealth cycle computers feature a full-time back light that can be set to turn on and stay for the duration of the ride. Like all CatEye computers, the Stealth computers are 100% waterproof up to 10 meters. Post ride, cyclists can upload their ride data to CatEyeAtlas.com or other web based training programs to see a map of where they rode, monitor performance, track training goals and share on social media.

CatEye optional ANT+ sensors (compatible with Stealth 50 ONLY.)

### 2.4GHZ DIGITAL WIRELESS / SPEED + CADENCE + HEART RATE (+ ALTITUDE: Q3a)

The Q Series is CatEye's new all-encompassing solution for your multi-sports needs. The Q Series features all of the standard cycling functions along with an accurate heart rate monitor in a compact, wrist-mounted, downloadable package. Both the Q3 and the Q3a allow you to customize your training experience with 5 programmable heart rate zones, up to 99 laps with real time lap functions, and both time and distance interval functions. It comes with the handlebar mount included and, when those open water swimmers call, is waterproof up to 30m.

The Q3a enhances your training with a fully functioning altimeter that will display your current and ascending altitude measurements as well as the slope angle and a temperature gauge. The Q Series functions on a 2.4GHz digitally encoded wireless band and will store up to 30 training files, downloadable with the USB Dongle (available separately). Along with your training data, it will record your total weekly, monthly, and yearly time and distance automatically.

### USB communication kit (included with the Windows version of e-Train Data™)

USB dongle to communicate wirelessly with the Q Series multi-sports computers and your PC. Download training data to your computer and change the Q Series' settings.

**e-Train Data™ Ver.4**  
System requirement: Win XP or later

The e-Train Data™ software enables you to plot and graph your training data, including altitude, heart rate, cadence, and speed on your PC. The graph can be easily enlarged for detailed analysis.

# CYCLOCOMPUTER

- WIRELESS / SPEED
- 8 FUNCTIONS & 10 FEATURES

The Strada Slim is a 'slimmed down' version of the popular Strada Wireless computer. Newly designed circuitry and increased efficiency allows for a smaller battery, so the computer can be thinner and lighter. The smaller package still boasts the same great cycling features and functions with a larger screen and the ability to customize your display by showing only the functions you select. The Strada Slim comes with a new Slim Sensor that can be placed inside the front fork so it is virtually out of sight, giving your road bike a sleek, aerodynamic look.

Slim sensor (SPD-02) designed for road bikes

\* If the slim speed sensor SPD-02 does not work on your bike, please use the analog speed sensor SPD-01. Strada Slim computer works with the SPD-01.

## STRADA CADENCE CC-RD200

- CADENCE
- 9 FUNCTIONS & 9 FEATURES

All of essential functions - plus cadence - with the mode button integrated into the computer face. Your legs are your engine, and the Strada Cadence is your tachometer. This sleek CatEye cycle computer delivers the essential functions of the Strada plus pedal cadence. The Strada Cadence boasts the largest screen and numbers in its class. With the ClickTec™ interface, you can switch among eight modes by simply pressing the bottom of the computer face. The innovative FlexTight™ bracket mounts quickly, securely and without tools to virtually any handlebar or stem. The tool-free speed and cadence sensor mounts effortlessly to any standard (non-elevated) chain stay. Are you spinning or grinding? Guess no more.

BRACKET & SENSOR

# CYCLOCOMPUTER

- WIRELESS / SPEED
- WIRELESS CYCLOCOMPUTER + 3-D PEDOMETER
- 9 FUNCTIONS & 8 FEATURES

Take your workout anywhere you go with all the cycling functions and features you've come to expect from CatEye plus the addition of a 3-D pedometer. Simply remove the CatEye Fit from your bike, throw it in your pocket or bag and away you go. The built-in 3-D sensors automatically track your steps once it's removed from the bike, so there's no need to strap it to your hip or waist. It tracks in real time current/average/max speed, elapsed time, distance and calories in Bike Mode and tracks steps, elapsed time, distance and calories in Walk Mode. The CatEye Fit is easy to use with auto data save and reset each day, a large, easy to read screen, and is available in black, white, and red with matching bicycle sensor.

ANALOG SPEED SENSOR (SPD-01)

\* This computer works with the slim speed sensor SPD-02.

MICRO WIRELESS  
CC-MC200W

- WIRELESS / SPEED
- CUSTOMIZE DISPLAY
- 9 FUNCTIONS & 9 FEATURES

No more scrolling through functions – the Micro Wireless allows you to customize your display and view it on a larger, LED backlit screen. It also features a slim body and is available in black or white. Functions include Current speed, Maximum speed, Average speed, Odometer, Trip distance 1 & 2, Elapsed time, Stopwatch and Clock. Stop watch in Auto mode is great for timing segments of the ride.

ANALOG SPEED SENSOR (SPD-01)  
\* This computer works with the slim speed sensor SPD-02.

ADVENTURE  
CC-AT200W

- DIGITAL WIRELESS / SPEED + ALTITUDE
- SEA LEVEL ALTITUDE / ASCENDING ALTITUDE / TOTAL ALTITUDE GAIN / SLOPE / TEMPERATURE
- 14 FUNCTIONS & 13 FEATURES

Whether for capturing the elevation off-road or all the rolling hills on a road ride, the Adventure is simple to use but feature packed. The ClickTec Plus™ single button design that is easy to use even in the most challenging terrain. With innovative features like reference and home altitude, second bike sensor recognition all in a digital wireless design, this is a computer rugged enough for off road and elegant enough for sleek road bikes. Innovative features meet smart design in the CatEye Adventure.

DIGITAL SPEED SENSOR

COMMUTER  
CC-COM10W

- WIRELESS / SPEED
- ETA / CARBON OFFSET / TEMPERATURE / VISUAL 10 SEGMENTS COUNT-UP TO DESTINATION WITH ARRIVAL ALERT
- 8 FUNCTIONS & 14 FEATURES

The first ever cycle computer specifically designed for commuters. Critical trip details make the Commuter the computer for making your rides stress-free. Estimated Time of Arrival, clock time, temperature and a backlight help ensure you stay on schedule. The new larger font size makes it easier to see your details with a quick glance. Standard computer features included along with your Carbon Offset so you will not only feel better from the bike ride, you'll feel better about the ride.

ANALOG SPEED SENSOR (SPD-01)  
\* This computer works with the slim speed sensor SPD-02.

## HEADLIGHT

The Sumo 3 is CatEye's new top-level rechargeable headlight system. With new optics and LED technology and producing 1,600 lm (5,500 candlepower) at max output, this light will outperform any other light currently on the market. The standard FlexTight™ bracket ensures maximum security and easily adapts to any style of handlebar. The 3 LED bulbs are protected by a sturdy, all aluminum housing. Featuring the DNA (Dynamic, Normal, and All-Night) power modes and one flashing mode, each battery charge will last between 1 and 35 hours. The 7.4V x 4600mAh Li-Ion battery has a charge time of 5 hrs.

CatEye's Sumo 2 lighting system is our mid level offering that outshines other brands' premium lights. With one less LED and a more compact battery than its big brother, the Sumo 2 puts out a powerful 1,000 lm (3,500 candlepower) at max output. The standard FlexTight™ bracket ensures maximum security and easily adapts to any style of handlebar. The 2 LED bulbs are protected by a sturdy, all aluminum housing. Featuring the DNA (Dynamic, Normal, and All-Night) power modes and one flashing mode, each battery charge will last between 1.5 and 35 hours. The 7.4V x 4600mAh Li-Ion battery has a charge time of 5 hrs.

### 3-level battery indicator

When the light unit is on, the color of the switch shows how much battery power remains.

## HEADLIGHT

For the focused, on-the-go multi-tasker, the Nano Shot + gives you one less thing to worry about, no matter where your travels take you. 2 super-bright, ultra-efficient LED's fire up 600 lumens (5,000 candlepower) in a lightweight design and rechargeable via any USB port, so you'll never ride home in darkness again no matter how busy you get.

Nano size, massive 250 lumen (2,000 candlepower) output. CatEye's Nano Shot HL-EL620RC is a compact, super light-weight USB rechargeable headlight featuring OptiCube™ technology to produce a powerful wide beam. The Li-Ion battery and included USB cable recharges the Nano in 5 hours and the low battery indicator warns you when your charge is getting low. Mode memory will remember the last lighting mode you used, be it High, low, or flashing modes. Run time of up to 12 hours keeps you safe throughout the night.

## HEADLIGHT

**ECONOM  
FORCE**

**ECONOM FORCE**  
**HL-EL540(RC)**

Ecology meets economy. The CatEye Econom Force uses ROL™ technology and 4 AA batteries to provide an efficient, regulated 170 lm (4,000 candlepower) light beam. Rechargeable version (HL-EL540RC) and standard version with upgradable option (HL-EL540).

Upgradable  
option  
(HL-EL540)

## HEADLIGHT

**ECONOM**

**ECONOM**  
**HL-EL340(RC)**

Ecology meets Economy. The CatEye Econom uses ROL™ technology and 2 AA batteries to produce 1,000 candlepower in this powerful package. Rechargeable version (HL-EL340RC) and standard version with upgradable option (HL-EL340).

Upgradable  
option  
(HL-EL340)

**UNO**  
OPTICUBE

**UNO**  
**HL-EL010**

Never get caught in the dark again. CatEye's Uno is the perfect light for around-town commuting or for an emergency light for when you stay late at the café. Super compact design throws more than 400 candlepower with our new OptiCube™ lens technology. One AA battery and one LED will run up to 60 hrs in flashing mode and up to 15 hrs in constant. Featuring water resistant construction and our FlexTight™ tool-free mounting bracket that allows you to quickly and easily attach the Uno to virtually any handlebar.

HEADLIGHT

Enjoy automatic safety with the CatEye Jido. Five 5 mm white LEDs turn on automatically whenever darkness and motion are detected. Easily choose between auto and manual mode for additional safety options. 4 AA batteries power the Jido for up to 60 hours in flashing mode. Constant mode provides 30 hours of runtime and a low battery indicator warns you when it's time to replace your batteries.

The HL-EL135 has three LEDs with OptiCube™ lens technology for a wider beam with excellent visibility. Featuring flashing and constant modes, as well as more than 320 hours of runtime. This is the perfect compact commuter light.

lm: Lumen  
cd: Candlepower

**Lumen** measures the total amount of light that a specific light system produces. Although lumen is an accurate measurement of light output, it says nothing about the efficiency of light projected. Respectively, a lighting system with a high lumen output may not be designed to utilize the light properly for cycling.

**Candlepower** is the specific measurement of projected light. As a preferred method of measurement by CatEye, this usable light is the result of complete consideration of the lighting system from the batteries and circuitry that drive the light source, to the lens and reflector that project the light.

SAFETY LIGHT

**RAPID 5**  
**TL-LD650**

Never be missed. The CatEye Rapid 5 tail safety light includes the high power center SMD-LED and two 5 mm LEDs of the Rapid 3, but adds two more side mounted high-power SMD-LEDs for maximum visibility from all directions. Four modes allow you to customize your visibility. The Rapid mode is an all out attention grabber, using all 5 LEDs in a unique pattern guaranteed to get you noticed. The peleton-friendly pulse mode foregoes the high-power center LED to save blinding your riding buddies, while the constant and flashing modes add daytime safety options. 2 included AAA batteries will run the Rapid 5 for up to 100 hours and comes with the newly designed SP-11 FlexTight™ bracket. Compatible with the all-new RM-1 Saddle Rail bracket and the clothing clip, available separately.

TL-LD630-R

TL-LD630-F

**RAPID 3**  
**TL-LD630**

The CatEye Rapid 3 head and tail lights include a high power center SMD-LED and two 5mm LEDs for outstanding visibility. Three modes allow you to customize your visibility. The Rapid mode is a specifically designed flashing pattern created to improve visibility and quickly capture driver's attention. A SP-11 (rear) or SP-12-F (front) FlexTight™ handlebar bracket is included and the Rapid 3 is also compatible with the RM-1 Saddle Rail bracket (rear) and the clothing clip, available separately.

TL-LD611-R

TL-LD611-F

**RAPID 1**  
**TL-LD611**

The CatEye Rapid 1 head and tail lights are USB rechargeable safety lights that feature a high power SMD-LED with OptiCube™ technology and a unique rapid flashing pattern that quickly grabs motorists' attention. The included USB charger rapidly rejuvenates the built in Li-Ion battery and a low-battery indicator reminds you when the charge is getting low. 4 modes give you a choice of visibility options for both nighttime and daytime safety. Both the white Front Rapid 1 and the red Rear Rapid 1 comes with the newly designed low-profile SP-12 FlexTight™ bracket. Compatible with the all-new RM-1 Saddle Rail bracket and the clothing clip, available separately.

SAFETY LIGHT

Never worry about turning your tail light on (or off) again! The new Reflex Auto tail light has both optic and motion sensors to determine when to automatically activate the light. When darkness and motion are detected the light turns on instantly! The combination of active and passive safety help provide even more visibility. The "active" safety refers to our standard tail light technology, perfected over years of development. The "passive" safety component refers to our outstanding CPSC/BS/ECE/JIS reflector design that has exceeded highest governmental standards for many years. The 5 super-bright modes, over 180 degrees of visibility, and various mount options will help you stand out from the crowd and guarantee you'll be noticed at night!

On or off, the New Reflex taillight works to make sure you are always visible thanks to both active and passive safety technologies. The "active" safety refers to our standard tail light technology, perfected over years of development. The "passive" safety component refers to our outstanding CPSC/BS/ECE/JIS reflector design that has exceeded highest governmental standards for many years. The 5 super-bright modes, over 180 degrees of visibility, and various mount options will help you stand out from the crowd and guarantee you'll be noticed at night!

SAFETY LIGHT

Five bright LEDs deliver great brightness with impressive runtime. New Omni Directional Technology increases safety while three modes – rapid, flashing and constant, let you select the right level of visibility. With two AAA batteries, the TL-LD155 will run up to 120 hours. The simple, tool-free FlexTight bracket and included clothing clip allow you to easily attach the Omni 5 anywhere you'd like. 360 degree visibility design for rear version.

Awesome triple-LED performance at an economical price. New Omni Directional Technology increases safety while three modes – rapid, flashing and constant - let you decide how flashy you want to be. Two AAA batteries provide up to 150 or 200 hours of run time. CatEye exclusive FlexTight bracket and included clothing clip allow you to mount the Omni 3 virtually anywhere you'd like. 360 degree visibility design for rear version.

SAFETY LIGHT

**BLITZ AUTO**  
**TL-AU330**

Storm the night. The Blitz Auto safety light combines extreme visibility with automatic technology. 5 efficient LEDs housed in a clear body run on 2 AA alkaline batteries for up to 400 hours. Motion and light sensors turn the Blitz Auto on whenever darkness and motion are detected and will stay on for 50 seconds after you've stopped riding. Need a little extra safety? The Blitz Auto can be switched from auto to manual mode for daytime use. With the included SP-11 FlexTight™ bracket for seatpost and seatstay mounting, the included rear rack bracket, and an optional clothing clip, the Blitz Auto can be mounted virtually anywhere.

**SOLAR**  
**SL-LD210**

Never ending safety. The CatEye Solar is a unique safety light that keeps you safe in all circumstances – automatically. One 5mm LED turns on automatically when darkness and motion are detected and the high-visibility flashing mode keeps you seen. The built in solar cell charges in 2 hours under good weather conditions and will power the Solar for up to 5 hours. Available in both white and red for front and rear applications and comes with the newly designed FlexTight™ bracket.

**LOOP**  
**SL-LD110**

Safety light design comes full circle with the CatEye Loop. This versatile, lightweight LED is the latest innovation in visibility. This light is uniquely designed to throw light in nearly all directions for added visibility. The go-anywhere elastic mount lets you customize your gear and quickly change configurations to keep your ride safe. CatEye Loop attaches easily and securely to handlebars, seat posts, and almost anywhere else. CatEye Loop features simple push-button operation, powerful constant and flashing modes and is available in white and red, front and rear styles. Another great formula from CatEye: Ride. Return. Repeat.

SAFETY LIGHT

**ORBIT**  
**SL-LD120**

Join the revolution in side-visibility design with the new CatEye Orbit. This lightweight, spoke-mounted LED projects light in virtually all directions. This unique placement creates eye-catching movement when you ride that will stop traffic, letting you maintain your sphere of influence on the darkest streets. CatEye Orbit come in amber only and feature powerful constant and flashing modes. They mount easily and securely to your wheel spokes without tools. Another road rule from CatEye: put a new spin on safety.
